

## **All-Steel Co. Buys the Macon Machine Co.**

A deal was consummated today between the officials of the All-Steel Motor Car Co., and the owners of the Macon Machine Co. whereby the entire plant of the latter, consisting of much valuable machinery, dies, tools, materials and entire plant equipment, becomes the property of the All-Steel Motor Car Co.

The removal of this plant from the buildings on Goggin Street, to the factory buildings of the All-Steel Motor Car Co., on Weed, Wabash tracks, and Bourke streets, will be started immediately.

The equipment, materials and machinery thus acquired represent an original investment value by the Macon Machine Co., of about \$10,000. It is valuable, especially to the All-Steel Motor Car Co. at this time in that it will very materially advance the time of beginning active operations in their factory. The installation of machinery has been delayed until this time pending the completion of the first model car.

The reports from the stock salesmen are very gratifying and especially so from St. Louis, where Mr. Calvin Tichenor of Willett & Tichenor, fiscal agents and general salesmanagers of the company's products, is personally directing a corps of competent salesmen.—Macon Chronicle Herald.
